Product Bulletin # TM-036 Rev 1

TM100 Clamp Cylinder Bushing Upgrade

An improved TM100 clamp cylinder assembly with improved reliability has been released.

The new TM100 clamp cylinder assembly includes:

- Improved bushings, made of high strength bronze
- Improved pin, made of high strength stainless steel, and
- Clamp Cylinder Rod with larger through-hole for clearance with die-holder retention bolt.

The previous cylinder, pins, and bushings have been obsoleted, they are no longer available.

Contact parts.sales@canrig.com to order the latest TM100 clamp cylinders, pins and spare bushings.

Affected Units

All Canrig Torq-Matic™ Wrenches model TM100.
